Spectral power distribution in the range 250 nm to 800 nm. at full-load	 <p>The graph displays the spectral power distribution (SPD) of the light source. The x-axis represents the wavelength in nanometers (nm), ranging from 250 to 800. The y-axis represents the relative power, ranging from 0.0 to 1.0. The curve shows a small peak at approximately 450 nm (blue) and a much larger, broader peak centered around 650 nm (red), with a maximum relative power of approximately 0.9. The spectrum is colored according to the visible light spectrum: blue, green, yellow, orange, and red.</p>
