

39 mm

The diagram shows a technical drawing of a tapered metal profile. The profile is shown in a perspective view, tapering from left to right. It features a top flange with four rectangular slots. A vertical dimension line on the left indicates a height of 39 mm, measured from the top of the flange to the bottom edge of the profile. A horizontal dimension line at the bottom indicates a width of 9 mm, measured from the left edge of the profile to the center of the bottom edge. Dashed lines are used to indicate the alignment of the dimension lines with the profile's features.
